PROBLEM DEFINITION

When an accident takes place the approach of ambulance may be late due to, corresponding area is far away from the places, this imparts more time results in loss of valuable lives.

LITERATURE SURVEY

- 
- Q. sir, when an accident occurs in sight of you. What you are supposed to do?
 - Ans. If there is a possibility we take the person to the hospital otherwise we call for an ambulance or try to save them as we can.
 - Q. Do you call for an ambulance to save a person when an accident occurs?
 - Ans. Yes, obviously that is the one thing we can do at far places where hospitals are rarely seen.
 - Q. If an ambulance is delayed for the approach, what will be the condition of the person?
 - Ans. He may die. Also if we take him to the hospital after the condition is prolonged he may or may not live.
 - Q. Do you think ambulances takes to a nearby hospital?
 - Ans. I think they has their corresponding hospitals and some private ambulances may take to near by hospital or dealed hospitals. I don't know what happens but I try to do what I can.

PROPOSED IDEA

OUR IDEA AND INTENTION IS ABOUT..

GETTING THE PATIENT TO THE HOSPITAL IMMEDIATELY.....

SO WE GOT THESE IDEA

METHODOLOGY

First we introduce our feature in Ola app through an update in playstore.

Then first the customer should install if he/she doesn't have otherwise they should update their current app.

Then they should register themselves in the new feature called "Ola Emergency".

WORKING PRINCIPLE

- For registration they should enter their phone number.
- Then if an accident occurs the people surrounding should dial Ola Emergency such that they should tell us the location so that we can know where to pick up the person.
- And then, the person is taken to the nearest hospital by an Ola cab.
- The money for admitting into the hospital the person reached can be transferred through our Ola emergency app only.

- By this the person can be saved in time, instead of contacting an ambulance...

ADVANTAGES

- There many advantages by using these private vehicles...
- Patient can admit in hospital with in a short time
- It takes less time when compared with ambulance
- It can easily access the people by using the location

APPLICATIONS

Hear Are Some Few Applications

- EMERGENCY SERVICES CAN EASILY REACH THE SPOT BY USING THE LOCATION
- TAKES THE LESS TIME COMPARED WITH AMBULANCE
- ANY TYPE OF EMERGENCY SERVICE CAN BE USED BY THIS

CONCLUSIONS

BY USING THESE METHODE WE CAN
REDUCE THE DEATH RATES
